Walther PPX 9mm & 40	PDA1 Fat Boy
Walther CCP	PDA40 Bodyguard Plus

EASY SIZE GUIDE & TRIMMING GUIDE

Make sure magazine is inserted

FOR OVERALL HOLSTER SIZE: ADD 0.50" to Length and 0.75" to Width & Thickness of internal dimensions. L/H/T

BREAK-IN STRETCH CAPACITY

LENGTH is the least critical dimension. Overage of 3/8" or less is easily accommodated, while overage of 1/2" may be problematical.

HEIGHT is more critical as it impacts how well the butt is concealed. We recommend no more than 3/16" as a practical limit.

NOTE: Overage in both length and height is generally impractical unless the overage is well below the maximum recommendations, particularly in height.

THICKNESS overage of 1/4" to 3/8" may be tolerated assuming there is no other overage, especially in height. It depends on how tightly the weapon fits otherwise.
